

## Maze 9 - Payroll Module

Manage payroll functions in Maze with this integrated solution

Our integrated payroll solution for Maze provides all payroll features commonly required by schools.

Maze Payroll Module is fully ATO compliant and handles all the standard payroll software requirements such as PAYG calculations, superannuation, fringe benefits tax (FBT) and leave management (sick, annual, LSL and other).

In addition, Maze Payroll Module is fully integrated with the Maze General Ledger, supports multiple PAYG payer or supplier entities and allows you to automatically generate weekly, fortnightly or monthly pays.

Pay slips and PAYG summaries can be printed or generated as PDF and emailed directly to your employees.

### Major improvements

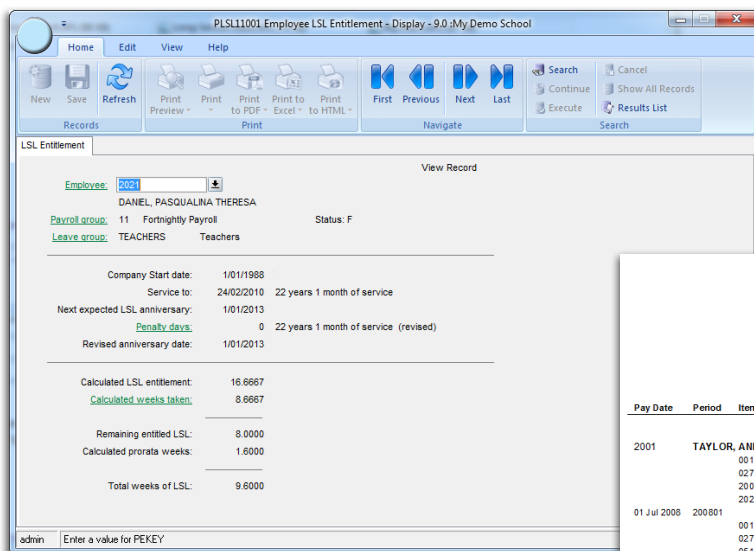

- Enhanced Long Service Leave management**  
 Maze now applies state based rules to accurately calculate LSL liability and accrual
- Date driven additions and deductions**  
 You have the option to specify a start and end date for any automatic additions or deductions, which is taken into account when generating a payroll batch
- Ability to automatically reverse your last payroll batch**  
 Need to reverse your last pay? No problem with this new batch process
- Payroll exceptions reporting prior to updating a payroll batch**  
 Allows you to compare a batch to the previous pay to pick up potential errors prior to posting
- Multiple years' pay history is retained**  
 Print historic pay transactions for any employee

### System Requirements

- Database platform: SQL Server 2005 (or later)
- Maze version: Maze 9.2 (or later)

### Integration with the new Maze Human Resource module will provide:

- Improved data quality, as all common staff/employee data is centrally managed
- Access to leave application information from within your payroll batch
- Ability for staff to access pay slips and PAYG summaries via Self Service Portal (through eMaze)

Long Service Leave Management
